About Me

Senior QA Engineer / Fullstack QA Engineer with 6+ years of professional experience in Web, Mobile, API, and integration testing.

4+ years of professional experience in backend and Android test automation with Kotlin. Experienced with REST/SOAP APIs, SQL, Kafka, CI/CD, log analysis, and test infrastructure.

I work across the entire system: from Web/Mobile clients to APIs, backend services, and integrations. I use AI Agents / LLMs for codebase and log analysis and for automating routine changes.

Technical Skills

Languages

Russian — Native

English — B2

Stack

Functional Testing Regression Testing API Testing Mobile Testing Web Testing SQL
REST API Git Jenkins Kafka Kotlin Test Automation AI-assisted Testing AI Agents / LLM

SimbirSoft

Senior QA Engineer / Fullstack QA Engineer

Key Achievements:

- Performed a large-scale refactoring of 1,200+ Android automated tests as part of test infrastructure changes.
- Reduced the full Android regression suite runtime by 60–70%, from 3–4 hours to 50–90 minutes, by optimizing UI scenarios with Deep Links, Intent interception, and controlled test states.

- Increased web regression test automation coverage from 80% to 95% within 2–3 months.
- Reduced the time required for typical bulk test code changes by 75%, from 2 hours to 30 minutes, using AI agents.
- Regularly conducted technical interviews for QA candidates.

Key Responsibilities:

- Web, Android, iOS, API, and integration testing.
- Backend and Android test automation with Kotlin; development of the internal automation framework and Custom DSL.
- REST/SOAP APIs, SQL, Kafka, Java stubs, and log analysis using Kibana.
- Mobile testing: Android/iOS, Espresso, Android Studio, Xcode, adb, device matrix, OS/SDK versions, Google Play, App Store, and TestFlight.
- Jenkins, Kubernetes, CI/CD, and test environments.

RITM

QA Engineer (Web / Android / iOS / API)

- Joined as the first QA engineer in a 4-person product team and established the core testing process from scratch.
- Built a regression suite of 100+ test cases.
- Tested Web, Android, iOS, REST APIs, IoT systems, and external integrations.
- Worked with MQTT, TCP/IP, TLS, PostgreSQL, MySQL, and Kafka.
- Used Xcode, Charles Proxy, Docker, Jenkins, Selenium, and JMeter.
- Conducted technical interviews for QA candidates.
